Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 8 is objected to because of the following informalities: In line 3, "lauryl cocoamphoacetate" should read laurylamphoacetate. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Component (b) requires an amphoteric surfactant, however component (c) is also an amphoteric surfactant. The examiner understands these are intended to be two different amphoteric surfactants, however, this must be made clear in the wording of the claim.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1751

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wells et al, US 2003/0202952.

Wells et al teach a shampoo containing anti-dandruff particles, an example of which comprises 12% sodium laureth sulfate, 2% sodium lauryl sulfate, 2% cocoamidopropyl betaine, 2% sodium lauroamphoacetate, 1% anti-dandruff agent, 0.5% cationic polymer, and the balance water (page 13, example 1). The compositions have a preferred pH as high as 7.5 (§73), and suitable anti-dandruff agents of the invention include climbazole (§54). Accordingly, it would have been obvious to one of ordinary skill in the art to use climbazole as the anti-dandruff agent in example 1 with a reasonable expectation of successfully obtaining an effective anti-dandruff shampoo.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art is cumulative or less pertinent than the reference above, and teaches shampoo compositions that contain the combination of surfactants claimed.
